Application/Control Number: 10/781,043

Art Unit: 3761

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Objections

2. Claim 19 is objected to because of the following informalities: the word "aor" appears to be misspelled. Appropriate correction is required.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Page 2

Application/Control Number: 10/781,043

Art Unit: 3761

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1- 6, 10-15, 18, 20, 21, 24-28, and 31-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirschman USPN 3983873.

As to claims 1, 2, 5, 10-12, 13-15, 18, 21, 24-28, and 31, Hirschman discloses an interlabial device comprising a pad, wherein the pad is configured to be retained between labia of a subject and the pad (Abstract). Hirschman discloses the pad is selfretained (col. 3, lines 7-10), which indicates no adhesive is used to retain the pad. The pad has a minor portion superimposed on a major portion, the minor portion having a cross-sectional area smaller than a cross-sectional area of the major portion (Figures 1-14). The minor portion is tapered to facilitate insertion between the labia and retention in the interlabial space (Abstract). Hirschman does not disclosed a method of using the pad for absorbing leakage from an anus or to treat hemorrhoids. However, the claimed novel structure of the pad is old and known from Hirschman. Since the claimed method also recites a method for using the structure, which is similar to Hirschman, it is within the level of one of ordinary skill in the art to use the pad for anal leakage. The pad is being used in the same manner to absorb leakage and is self-retained within the user. "When the claim recites using an old composition or structure and the "use" is directed to a result or property of that composition or structure, then the claim is anticipated. In re May, 574 F.2d 1082, 1090, 197 USPQ 601, 607 (CCPA 1978)"; In re Tomlinson, 363 F.2d 928, 150 USPQ 623 (CCPA 1966).

Regarding the limitation of "a width, which is wider than a normal anatomic intergluteal space", applicant has not defined a normal anatomic intergluteal space,

Art Unit: 3761

which obviously can vary depending on the user. The fact that the pad of Hirschman is self-retained in the user indicates it has sufficient width (in the posterior portion), which is wider than a 'normal' anatomic intergluteal space.

As to claim 3, Hisrchman discloses the pad is a highly absorbent non-swellable material (Hirschman col. 2, lines 61-64).

As to claim 4 and 20, see Hirschman figures 1-14 and Hirschman Abstract.

As to claim 6, see Hirschman figures 13-15.

As to claims 32, 34-41, see Hirschman Figures 1-14.

As to claims 33, Hirschman discloses the pad is self-retained (col. 3, lines 7-10), which indicates no adhesive is used to retain the pad.

5. Claims 7, 8, 9, 19, 22, 23, 42, and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirschman USPN 3983873 in view of Rosenbluth USPN 5074855

As to claims 8, 19, 22, and 42, Hirschman does not disclose the pad carries a therapeutically or diagnostically effective amount of a diagnostic or therapeutic agent. Rosenbluth discloses a pad, which carries a therapeutically or diagnostically effective

Art Unit: 3761

amount of a diagnostic or therapeutic agent for the benefit of preventing drying of the wearer's tissue and to reduce friction of the structure against the wearer (Rosenbluth col. 2, lines 55-57 and col. 5, lines 7-11). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the pad of Hisrchman to have a therapeutically or diagnostically effective amount of a diagnostic or therapeutic agent for the benefit of inhibiting infection. Because the pad comprises a medically-active compound, its use inherently requires selecting a person in need of a medically-active compound.

As to claim 7, see Rosenbluth col. 5, lines 7-11.

As to claims 9, 23, and 43 see Rosenbluth col. 2, lines 55-57 and col. 5, lines 7-11.

6. Claims 16, 17, 29, and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirschman USPN 3983873 in view of Okuda et al. USPN 4920045. Hirschman does not disclose the step of performing a diagnostic test on the fecal material. Okuda discloses detection of occult blood in feces for the purpose of early finding an abnormality such as cancer or ulcer in digestion organs at an early stage (col. 4, lines 4-14). It would have been obvious to one having ordinary skill in the art to provide the step of diagnostic testing for the benefits disclosed in Okuda.

Application/Control Number: 10/781,043

Art Unit: 3761

Allowable Subject Matter

Page 6

7. Claim 44-48 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacqueline F. Stephens whose telephone number is (571) 272-4937. The examiner can normally be reached on Monday-Friday 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tanya Zalukaeva can be reached on (571) 272-1115. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
